TC20 Mopping System

992945 | Red

992946 | Blue

992947 | Green

992948 | Yellow

Strong carry handle and sturdy legs with 7.5cm castors & colour coded wringer. Accepts Kentucky mops from 340g to 510g.

- ① Fill up your appropriately-coloured LTS bucket with water to the base of the wringer, then add the required chemical.
- ② Place your mop into your bucket of solution, before inserting into the wringer and pressing the lever down firmly to remove excess water. Always lay the mop in the wringer flat, do not twist it.
- ③ Always start mopping by going around the edges, then work backwards and move your mop in overlapping motions, making sure every area is covered. Once the mop becomes dirty, the Colour Changer can be flipped over for a new clean mopping surface.
- ④ To finish, wring out mop and use a dabbing motion to absorb up any excess liquid that might remain.

**Remember:** before beginning any cleaning task always put out your Safety sign to warn others of any slip or trip hazards.

**SIR**
